Kindly lend us a hand to enable specially abled to walk by providing us **High Quality CAD/CAM Equipment.**

Many amputees who get injured by the accident lost an arm or a limb. Narayan Seva Sansthan with the help of its supporters works tirelessly to provide them good quality prostheses so that they can walk again. The goal of prosthetic arms and legs is to restore some degree of normal function to those with disabilities. Since ancient times, there may have been mechanical devices that help the differently-abled walk again or continue to use two hands. Recently, computers have helped with prosthetic fitting for patients with disabilities. At NSS a patient's hand or foot is modelled using CAD/CAM technology, and this model is then used to create a mould from which the replacement limb can be shaped. Thus, we need your support to get new CAD/CAM machines so we can create high-quality limbs and make this great endeavour a reality.

Garib Pariwar Ration Yojana (Malnutrition)

India's statistics on malnutrition and hunger-related mortality are concerning because a large portion of the population struggles to eat enough food each day. Additionally, a lot of working-class families in poverty who lack education and good jobs are in need of your assistance to escape poverty. With the aid of our most recent initiative, the Narayan Garib Parivar Yojana, we are continually working to reach out this vulnerable segment of society.

Narayan Garib Parivar Yojana support the impoverished families associated with the sansthan by giving them monthly ration items like wheat flour, lentils, cooking oil, spices, etc. To ensure that no one in a family goes to bed hungry, each household receives supplies on a monthly basis.

Your little donation of Rs 2000 can feed one family for an entire month and increase their chances of survival.
